BCH - Biochemistry

BCH 104RN. The Biochemistry of Health for Non-Science Majors. 4 Credits. (3 Lec; 1 Lab) S
Introduction for non-science majors to the biochemical basis of nutrition, health, DNA, and the human genome. The class and laboratory includes training for in-depth searching of Internet and library information resources, evaluating and presenting the information found, and an introduction to DNA fingerprinting.

BCH 194. Seminar/Workshop. 1 Credit. (1 Sem) F
For the new student. Integration into the department and campus community. Scientific communication and chemical literature searching skills. Cross-listed with CHMY 194.

BCH 290R. Undergraduate Research. 1-6 Credits. (1-6 Ind; 6 cr max) F,S
PREREQUISITE: Consent of instructor. Directed undergraduate research/creative activity which may culminate in a written work or other creative project. Course will address responsible conduct of research. May be repeated.

BCH 292. Independent Study. 1-3 Credits. (1-3 Ind; 6 cr max) On Demand PREREQUISITE: Consent of instructor and approval of department head. Directed research and study on an individual basis.

BCH 294. Seminar/Workshop. 1 Credit. (1 Sem; 4 cr max) S
PREREQUISITE: CHMY 194 or BCH 194. Introduces students to faculty research and departmental research facilities, with the goal of assisting students in the process of joining a research group. Issues related to becoming engaged in a research groups including how to keep a research notebook, lab safety, ethics, etc. are also considered. Cross-listed with CHMY 294.

BCH 380. Biochemistry. 5 Credits. (4 Lec, 1 Lab) F,S,Su PREREQUISITE: BIOB 160 or BIOB 260, and CHMY 211 or CHMY 323 or CHMY 333. Carbohydrate, lipid, protein, and nucleic acid structure and function; enzyme kinetics; energetics; major metabolic pathways for carbohydrates, lipids, and amino acids; photosynthesis; regulation of gene function.

BCH 381. Biochemistry Lab. 1 Credit. (1 Lab) F,S
PREREQUISITE: Previous or concurrent enrollment in BCH 441. Biochemistry lab intended for Chemistry majors to accompany BCH 441.

BCH 394. Seminar/Workshop. 1 Credit. (1 Sem) F
PREREQUISITE: CHMY 294 or BCH 294. Developing student presentation skills thru the preparation and presentation of a group 50-minute talk on a chemical topic of current interest. Career planning and resume preparation. Cross-listed with CHMY 394.

BCH 441. Biochemistry of Macromolecules. 3 Credits. (3 Lec) F
PREREQUISITE: BIOB 160 or BIOB 260 and CHMY 323 or CHMY 333. Biochemical basis of modern molecular biology; structure and function of proteins, nucleic acids, and membranes; replication; transcription; translation; regulation of gene expression; and recombinant DNA.

BCH 442. Metabolic Regulation. 3 Credits. (3 Lec) S
PREREQUISITE: BCH 441 or consent of instructor. In-depth biochemical treatment of metabolism and its regulation in cellular processes.

BCH 444R. Biochemistry & Molecular Biology Methods. 3 Credits. (1 Lec, 2 Lab) F,S
PREREQUISITE: BCH 441 or consent of instructor. This course focuses on molecular biology/biochemistry procedures integral to current research. Methods include PCR; gene cloning; DNA sequencing; and expression, isolation, purification, and characterization of the gene-encoded protein.

BCH 446. Metabolomics and Systems Biology. 3 Credits. (3 Lec) S
PREREQUISITE: BCH 441, BCH 442, M171Q, M172Q. The course will cover the language, methods and scientific literature surrounding metabolomics and systems biology and examples of applications to understanding mechanisms in health and disease. Students will increase their understanding of biological circuits and feedback regulation with emphasis on changes in metabolism that are close to phenotype in health and disease. Students will become familiar with the most recent scientific literature on metabolomics and systems biology that is relevant to understanding biological mechanisms of interest to them.

BCH 450. X-Ray Crystallography. 3 Credits. (3 Lec) S
PREREQUISITES: M 172 COREQUISITES: CHMY 323 or BCH 380 or BCH 441 or PHSX 224 or instructor's approval. This course focuses on the theory of small and macromolecular structure determination by x-ray crystallography. Topics include crystallization of small and macromolecules, and molecular structure determination from single crystal X-ray diffraction data, including model building, refinement and validation. Co-Convened with BCH 350.
**BCH 550. X-ray Crystallography. 3 Credits.** (3 Lec) S alternate years, to be offered every other year.

**PREREQUISITE:** BCH 441 and BCH 442 or the equivalent and M 182M. This course focuses on theory and practice of molecular structure determination by x-ray crystallography. Topics include crystallization of macromolecules, molecular structure determination from x-ray data, and evaluation of the quality of the resulting macromolecular models. Co-Convened with BCH 450.

**BCH 553. Protein Structure, Function, and Evolution. 3 Credits.** (3 Lec) S

**PREREQUISITE:** BCH 543. Focus is on the integration of results from multiple experimental approaches, including activity assays, kinetics, thermodynamics, bioinformatics, molecular evolution, protein structure and protein dynamics. Students will draw upon the primary literature to gather and integrate relevant results to derive detailed composite models for how specific proteins function.

**BCH 575. Professional Paper. 1-6 Credits.** (1-6 Ind; 6 cr max) F,S

**PREREQUISITE:** Consent of instructor. A research or professional paper or project dealing with a topic in the field. The topic must have been mutually agreed upon by the student and his or her major advisor and graduate committee. Cross-listed with CHMY 575.

**BCH 590. Master's Thesis. 1-10 Credits.** (1-10 Ind; max unlimited) F,S,Su

**PREREQUISITE:** Master's standing.

**BCH 591. Special Topics. 1-4 Credits.** (1-4 Lec; 12 cr max) On Demand

**PREREQUISITE:** Upper division courses and others as determined for each offering. Courses not required in any curriculum for which there is a particular one time need, or given on a trial basis to determine acceptability and demand before requesting a regular course number.

**BCH 592. Independent Study. 1-3 Credits.** (1 Ind; 3 cr max) On Demand

**PREREQUISITE:** Graduate standing, consent of instructor, approval of department head and Dean of Graduate Studies. Directed research and study on an individual basis.

**BCH 594. Seminar. 1 Credit.** (1 Sem; max unlimited) F,S

**PREREQUISITE:** Graduate standing or seniors by petition. Course prerequisites as determined by petition. Course prerequisites as determined for each offering. Topics offered at the graduate level which are not covered in regular courses. Students participate in preparing and presenting discussion material. May be repeated. Cross-listed with CHMY 594.

**BCH 689. Grad Research/Instruction. 1-3 Credits.** (1-3 Lec; 3 cr max) F,S,Su

**PREREQUISITE:** Graduate standing. **COREQUISITE:** BCH 590 or BCH 690. Classroom instruction associated with directed graduate research/creative activity projects.

**BCH 690. Doctoral Thesis. 1-10 Credits.** (1-10 Ind; max unlimited) F,S,Su

**PREREQUISITE:** PhD standing.
