BIOO 162CS. Insects and Human Society. 3 Credits. (2 Lec, 1 Lab) S
Ways in which research and advances in technology in the areas of insect biology and management have influenced people's lives throughout the world. Focus will be on insects as major factors affecting the areas of the world where humans live, crops and animals humans produce, and general quality of life on the planet. Interactions of insects and human cultures, technologically oriented and indigenous, non-technology based cultures, and concepts of pest management will also be explored. Students generate and test hypothesis and evaluate sources of scientific information on these topics.

BIOO 220. General Botany. 3 Credits. (3 Lec) F
PREREQUISITE: BIOB 170IN. This course focuses on organisms that possess plastid organelles in all their cells, and investigates their function (physiology, biochemistry), diversity, life cycles, and environmental adaptations.

BIOO 230. Identification of Seed Plants. 4 Credits. (2 Lec, 2 Lab) S
PREREQUISITE: BIOB 170IN. Identification of conifers, trees and shrubs, and herbaceous seed plants; determination by use of manuals; vocabulary, classification and nomenclature; and preparation and collection of seed plant specimens.

BIOO 262IN. Introduction to Entomology. 3 Credits. (2 Lec, 1 Lab) F
PREREQUISITE: One of the following: BIOL 100IN, or BIOB 170IN. General biology of insects including principles of morphology, physiology, behavior, ecology, and control. Includes identification of major orders and common families.

BIOO 301. Comparative Vertebrate Anatomy. 4 Credits. (2 Lec, 2 Lab) F
PREREQUISITE: BIOO 220 or BIO 258. A comparative study of organ systems of vertebrates. Laboratory utilizes representative vertebrate types.

BIOO 412. Animal Physiology. 3 Credits. (3 Lec) F
PREREQUISITE: Junior or Senior standing. BIO 160 or BIO 260; and one of the following: CHMY 211, CHMY 321, or CHMY 123. General homeostatic physiology of animals with emphasis on mammals. Selected body systems are covered with major emphasis on the integration of body processes.

BIOO 415. Ichthyology. 3 Credits. (2 Lec, 1 Lab) S

BIOO 445. Insect Identification. 4 Credits. (2 Lec, 2 Lab) S alternate years, to be offered odd years.
PREREQUISITE: BIOO 262IN and one of the following: BIOB 100IN, BIOB 160 or BIOB 258. The identification of insects and related terrestrial arthropods. Evolutionary patterns reflected in modern insect diversity will be used to illustrate classification methods. Taxonomic methods will be used as an access to information retrieval.

BIOO 470. Ornithology. 3 Credits. (2 Lec, 1 Lab) S
PREREQUISITE: BIOO 310 and at least Junior standing. Evolution, functional biology, distribution, and classification of birds. Montana species recognition is developed through laboratory use of a representative skin collection.

BIOO 475. Mammalogy. 3 Credits. (2 Lec, 1 Lab) F
PREREQUISITE: BIOO 310 and at least Junior standing. Evolution, functional biology, distribution, and classification of mammals. Labs cover taxonomy and identification of representative forms with a focus on Montana species.
