### EENV - Environmental Engineering

**EENV 102 Introduction to Environmental Engineering Design and Sustainability:** 3 Credits (2 Lec, 1 Lab)

Students will gain a fundamental understanding of environmental engineering and sustainability, learn engineering tools, receive an introduction to the engineering design process and build professional skills. Lab includes a semester long group project on an environmental engineering topic.

**EENV 240 Chemistry for Environmental Engineers:** 3 Credits (3 Lec)

**PREREQUISITES:** CHMY 143 or CHMY 153 Fundamentals of physical, biochemistry and organic chemistry with an emphasis on environmental engineering applications

**EENV 292 Independent Study:** 1-3 Credits (1-3 Other)

**PREREQUISITE:** Consent of instructor and approval of department head. Directed research and study on an individual basis. Repeatable up to 6 credits.

**EENV 340 Principles of Environmental Engineering:** 3 Credits (3 Lec)

**PREREQUISITE:** CHMY 143 or CHMY 153

**COREQUISITE:** EGEN 335 or ECIV 337 or ECHM 321. Fundamentals of environmental engineering with emphasis on water and wastewater remediation.

**EENV 341 Physical and Chemical Treatment Processes:** 4 Credits (3 Lec, 1 Lab)

**PREREQUISITE:** EENV 240 and ECHM 201. Principles of water chemistry, reactor theory, and unit operations are applied to water treatment processes, with a focus on municipal drinking water systems.

**EENV 342 Biological Treatment Processes:** 4 Credits (3 Lec, 1 Lab)

**PREREQUISITE:** EENV 341 Physical and Chemical Treatment Processes. Principles of microbial kinetics, biological reactors and unit operations are applied to water treatment, with an emphasis on municipal wastewater treatment.

**EENV 387 Environmental Laws and Regulations:** 3 Credits (3 Lec)

**PREREQUISITE:** EGEN 335 or ECIV 337 or ECHM 321. Introduction to major environmental laws and regulations and the impacts of pollution by review of case studies.

**EENV 432 Advanced Engineering Hydrology:** 3 Credits (3 Lec)

**PREREQUISITE:** EENV 340 or ECHM 321 Fundamentals of aquatic systems with focus on site investigations, remediation and incorporation of modeling studies.

**EENV 440 Water Chemistry for Envr Engr:** 3 Credits (3 Lec)

**PREREQUISITE:** EENV 340 or EENV 341 Fundamentals of aquatic chemistry and principles of water technology for environmental engineers. Based on chemical thermodynamics. Students learn to quantify water quality and control parameters characterizing water quality. Co-convened with EENV 540. Students enrolled in this course will not be able to take EENV 540 and have it count toward degree requirements.

**EENV 441 Natural Treatment Systems:** 3 Credits (3 Lec)

**PREREQUISITE:** EENV 340 or EENV 342. Planning, design, and operation of remediation facilities emphasizing natural versus mechanical elements. Specific topics include stabilization ponds, constructed wetlands, land treatment, and on-site domestic systems.

**EENV 443 Air Pollution Control:** 3 Credits (3 Lec)

**PREREQUISITE:** EENV 340 or EENV 341. Principles, theory, and practice of treating hazardous materials.

**EENV 489R Environmental Engineering Design I:** 2 Credits (1 Lec, 1 Lab)

**PREREQUISITE:** EGEN 310R, ECIV 333 and EENV 341 and student must be within two semesters of graduation. Senior capstone course. Discussion of the design process from conceptual/preliminary design to final design, plans, and specifications. Develop proposal for engineering services, including scope of work, data acquisition, and organization of design team.

**EENV 490R Undergraduate Research:** 1-6 Credits (1 Other)

Directed undergraduate research which may culminate in a research paper, journal article, or undergraduate thesis. Course will address responsible conduct of research. May be repeated. Repeatable up to 12 credits.

**EENV 491 Special Topics:** 1-3 Credits (1-3 Lec)

**PREREQUISITE:** Course prerequisites as determined for each offering. Courses not required in any curriculum for which there is a particular one-time need, or given on a trial basis to determine acceptability and demand before requesting a regular course number. Repeatable up to 12 credits.

**EENV 492 Independent Study:** 1-3 Credits (1-3 Other)

**PREREQUISITE:** Junior standing, consent of instructor, and approval of Department Head. Directed research and study on an individual basis. Repeatable up to 4 credits.

**EENV 499R Environmental Engineering Design II:** 2 Credits (1 Lec, 1 Lab)

**PREREQUISITE:** EENV 489R. Senior capstone course. Design of an engineering project. Evaluation of design alternatives and design recommendations. Development of construction documents. Discussion of project management, cost estimates, and engineering services during construction.

**EENV 534 Environmental Engineering Investigation:** 3 Credits (3 Lec)

**PREREQUISITE:** EENV 434 or EENV 529. Laboratory and field investigations for design and analysis of environmental engineering systems with focus on site investigations, remediation and incorporation of modeling studies.
EENV 540  Water Chemistry for Envir Engr: 3 Credits (3 Lec)
PREREQUISITE: EENV 340 or EENV 341. Fundamentals of aquatic
chemistry and principles of water technology for environmental engineers.
Based on chemical thermodynamics. Students learn to quantify water
quality and control parameters characterizing water quality. Co-convened
with EENV 440. Students enrolled in this course will not be able to take
EENV 440 and have it count toward degree requirements.

EENV 561  Environ Eng Reactor Theory: 3 Credits (3 Lec)
PREREQUISITE: EENV 340 or EENV 341. Theory and mathematics of
reactors commonly used in water and wastewater operations.

EENV 562  Water Treatment Process/Design: 3 Credits (3 Lec)
Principles, theory, and practice of water treatment plant design.

EENV 563  Wastewater Treat Proc/Design: 3 Credits (3 Lec)
PREREQUISITE: EENV 561. Principles, theory, and practice of
wastewater treatment plant design.

EENV 575  Research or Prof Paper/Project: 1-4 Credits (1 Other)
PREREQUISITE: Graduate standing. A research or professional paper or
project dealing with a topic in the field. The topic must have been mutually
agreed upon by the student and his or her major adviser and graduate
committee.
Repeatable up to 6 credits.

EENV 589  Graduate Consultation: 1-3 Credits (1-3 Other)
PREREQUISITE: Master’s standing and approval of the Dean of Graduate
Studies. This course may be used only by students who have completed all
of their coursework (and thesis, if on a thesis plan) but who need additional
faculty or staff time or help.
Repeatable up to 3 credits.

EENV 590  Master’s Thesis: 1-10 Credits (1 Other)
PREREQUISITE: Master’s standing. May be repeated.
Repeatable up to 99 credits.

EENV 591  Special Topics: 1-3 Credits (1-3 Lec)
PREREQUISITE: Upper division courses and others as determined for
each offering. Courses not required in any curriculum for which there is a
particular one time need, or given on a trial basis to determine acceptability
and demand before requesting a regular course number.
Repeatable up to 12 credits.

EENV 592  Independent Study: 1-3 Credits (1 Other)
PREREQUISITE: Graduate standing, consent of instructor, approval of
Department Head and Dean of Graduate Studies. Directed research and
study on an individual basis.
Repeatable up to 6 credits.

EENV 598  Internship: 2 Credits (2 Other)
PREREQUISITE: Graduate standing, consent of instructor and approval
of Department Head. An individual assignment arranged with an agency,
business or other organizations to provide guided experience in the field.
Repeatable up to 12 credits.

EENV 690  Doctoral Thesis: 1-10 Credits (1-10 Other)
(1-10 Ind; max unlimited) F,S,Su Prerequisite: Doctoral Standing.
