EIND - Industrial Engineering

EIND 101. Introduction to Industrial & Management Systems Engineering. 1 Credit. (1 Lec) F
PREREQUISITE: Must be taken the first year enrolled in IE program. Overview of the industrial engineering profession. Lectures will concentrate on tools and methods of industrial and management system engineering, and their application in manufacturing and service industries.

EIND 142. Introduction to Systems Engineering. 2 Credits. (1 Lec, 1 Lab) S
Introduces students to the importance of understanding how systems function. Includes the common tools and activities used by industrial and Management Systems Engineers to analyze, design, and manage human-centered systems. Labs provide students with opportunities to experience these tools and activities. Contemporary industrial engineering topics are discussed, such as automation, social justice, and sustainability.

EIND 290R. Undergraduate Research. 1-6 Credits. (1-6 Ind; max unlimited) ES
Directed undergraduate research which may culminate in a written work or other creative project. Course will address responsible conduct of research. May be repeated.

EIND 291. Special Topics. 1-4 Credits. (1 Lec; 12 cr max) On Demand
PREREQUISITE: None required but some may be determined necessary by each offering department. Courses not required in any curriculum for which there is a particular one-time need, or given on a trial basis to determine acceptability and demand before requesting a regular course number.

EIND 300. Engineering Management & Ethics. 3 Credits. (3 Lec) F
PREREQUISITE: WRIT 101W, COMX 111US, and Junior standing. Introduction to management, leadership and organizational theory with applications to the engineering profession. Communication skills, social responsibility and ethical decision making for managers and engineers emphasized throughout. Cases and class exercises used to illustrate contemporary problems and environments.

EIND 313. Work Design and Analysis. 3 Credits. (2 Lec, 1 Lab) S
PREREQUISITE: WRIT 101W; EIND 142 for IE majors. Covers analysis and design methods for occupational tasks to improve productivity, workplace health, and safety. Topic areas include fundamental aspects of work standards development, ergonomics, and industrial safety. The labs demonstrate example applications of these topic areas.

EIND 354. Engineering Probability and Statistics I. 3 Credits. (3 Lec) F
PREREQUISITE: M 165Q or equivalent. Introduces students to the importance of understanding how systems function. Emphasis is placed on innovation in design to create enjoyable (fun) user experiences.

EIND 410. Interaction Design. 2 Credits. (2 Lec) S
PREREQUISITE: EIND 313 or EGEN 310R (or equivalent) for Engineering majors. This course demonstrates the processes of integrating the psychology of the user into the design process as well as conducting usability testing to evaluate the design success. It emphasizes the need to understand the needs, capabilities, and emotions of the user to produce usable and desirable designs. Emphasis is placed on innovation in design to create enjoyable (fun) user experiences.

EIND 411. Interaction Design Project. 1 Credit. (1 Rec) S
COREQUISITE: EIND 410. Applications of interaction design methods discussed in EIND 410 to an actual product or service concept (prototype), based on student project teams guided by faculty.

EIND 413. Ergonomics & Human Factors Engineering. 3 Credits. (3 Lec) F
PREREQUISITE: EGEN 305 or EGEN 322. EIND 313 for IMSE majors; or consent of instructor. Applications of ergonomics and human factors engineering. Topics include principles of anthropometrics, biomechanics, bioinstrumentation, physiology, design error, design for special populations (e.g., those with disabilities), mental stress/ workload, and risk assessment methods for work applied to common problems faced by engineers. Emphasis on design and analysis of occupational systems and consumer products which best fit job tasks or user requirements to human capabilities.

EIND 422. Introduction to Simulation. 3 Credits. (3 Lec) F
PREREQUISITE: CSCI 127 or equivalent, and EIND 354 or equivalent. Discrete simulation modeling methodology; sampling, output analysis, validation, and verification; application to varied systems design and analysis problems. Cross-listed with CSCI 477.

EIND 425. Technology Entrepreneurship. 3 Credits. (3 Lec) F
PREREQUISITE: EGEN 325 or EGEN 330 or equivalent. Introduction to principles of entrepreneurship and starting a business. Students learn how to formulate, plan, and implement a new venture, emphasizing the unique intellectual property, funding and marketing/selling concerns of technology startups. Includes extensive use of technology examples and case studies.

EIND 434. Project Management for Engineers. 3 Credits. (3 Lec) F
PREREQUISITE: Junior standing. Fundamental principles of planning and executing engineering and research projects, including estimating, budgeting, scheduling, controlling, software applications, and Agile project management approaches. Focus on management practices that drive success in domestic and international projects including team development and communication practiced through a term project.

EIND 442. Facility and Material Handling Systems Design. 3 Credits. (3 Lec) F
PREREQUISITE: IMSE seniors in their last full academic year, EIND 313, EMEC 103, ETME 215, COREQUISITE: EIND 300. Senior capstone course. The first course in the senior capstone sequence. Principles and techniques for planning and designing production facilities and material handling systems. Product and process analysis, requirements, layout and support facilities. Computer-aided analysis and design.

EIND 454. Engr Probability and Stats II. 3 Credits. (3 Lec) On Demand
PREREQUISITE: EIND 354. Identification, characterization, and analysis of variation in engineering data. Includes inferential statistics, goodness of fit, applications of non-parametric statistics, curve fitting, regression, and the design of engineering experiments. A team design project is required.

EIND 455. DOE for Engineers. 3 Credits. (3 Lec) S, odd years
PREREQUISITE: EIND 354 or consent of instructor. Statistical analysis for managerial decision-making as applied to engineering problems. Single and multi-factor ANOVA, randomized complete, full-blow and fractional designs with blocking and confounding. Introductions to nested and split-plot designs, multiple regression and response surface designs.

EIND 457. Regres & Multivar Analysis. 3 Credits. (3 Lec) S, even years
PREREQUISITE: EIND 354 or consent of instructor. Advanced topics in applied statistical analysis for engineers. Topics include regression techniques: ANOVA, simple linear regression, multiple linear regression, and variable selection procedures; and multivariate analysis techniques: principal components, factor analysis, canonical correlation analysis, and clustering methods. Statistical analysis for managerial decision-making as applied to engineering problems. Co-convened with EIND 557.

EIND 458. Production & Engineering Mgmt. 3 Credits. (3 Lec) S
COREQUISITE: EIND 464 or consent of instructor. Design and management of efficient production/delivery systems for goods and services, emphasizing quantitative analysis and systems approaches. Topics include forecasting, inventory management, production planning, scheduling, material planning, and lean manufacturing systems.

EIND 464. Prin of Operations Research II. 3 Credits. (3 Lec)
PREREQUISITE: EIND 354 and EIND 364. Advanced formulation of models, optimization techniques and application to engineering design and operations management decision making. Integer programming algorithms. Stochastic models including advanced queuing and general Markov processes.

EIND 468. Managerial Forecasting & Decision Analysis. 3 Credits. (3 Lec) F
PREREQUISITE: EIND 354. Time series analysis through classical approaches; auto-regression, smoothing models, and advanced time series models. Technical applications emphasized. Includes investigations into financial and dependent data. Approaches designed for managers to test real applications for making decisions.
EIND 477. Quality Management Systems. 3 Credits. (3 Lec) S
PREREQUISITE: EIND 354 or EGEN 350 or consent of instructor. Introduction to industrial methods used to improve the quality of products and services and their application. Quality management approached from both qualitative and quantitative (statistical) tools. Emphasis on Six Sigma methods through case studies and projects.

EIND 490R. Undergrad Research. 1-6 Credits. (1 Ind; 12 cr max) ES,Su
PREREQUISITE: Junior standing, consent of instructor, and approval of certifying officer. Directed undergraduate research/creative activity which may culminate in a research paper, journal article, or undergraduate thesis. Course will address responsible conduct of research. May be repeated.

EIND 491. Special Topics. 1-4 Credits. (1-4 cr)
PREREQUISITE: Course prerequisites as determined for each offering. Courses not required in any curriculum for which there is a particular one-time need, or given on a trial basis to determine acceptability and demand before requesting a regular course number.

EIND 492. Independent Study. 1-3 Credits. (1 Ind; 6 cr max) ES,Su
PREREQUISITE: Junior standing, consent of instructor, and approval of department head or director. Directed research and study on an individual basis.

EIND 499R. Industrial Engineering Design Capstone. 3 Credits. (1 Lec, 2 Rct) S
PREREQUISITE: EGEN 310R, EGEN 345, EIND 350, EIND 454 and EIND 442. Corequisite: EIND 458. Second course in senior capstone sequence. An open-ended team design project emphasizing the application of industrial engineering tools and knowledge to create engineered solutions for real business needs or opportunities. Experiential learning, oral and written communication and project management emphasized. Co-convened with EFIN 499R.

EIND 500. Engineering Organizational Change and Innovation. 3 Credits. (1 Lec, 2 Rct) F
PREREQUISITE: EIND 300 or EIND 574 or consent of instructor. Advanced topics in organizational change management and innovation viewed from an engineering perspective. Emphasis placed on understanding the need for change, systems thinking approaches, the role of corporate culture and leadership, and ethical approaches to change management. The differing role of employees and management in innovation and implementing engineering process improvement are examined.

EIND 506. Healthcare Delivery Systems. 3 Credits. (3 Lec) S
PREREQUISITE: NRSG 505 or EIND 458 or consent of instructor. This interdisciplinary course targets nursing students pursuing certification as a Clinical Nurse Leader and Industrial Engineering students who intend to work in the healthcare sector. Students will learn strategies for analyzing and improving processes, coordinating interdisciplinary healthcare teams, enhancing healthcare quality management, and reducing health risk through medical error elimination. This course is cross listed with NRSG 608.

EIND 509. Systems Simulation. 3 Credits. (3 Lec) F
Alternate Odd Years PREREQUISITE: CSCI 111 or CSCI 127, EIND 354, EIND 442, or consent of instructor. Systems exhibiting randomness are modeled and statistically analyzed using a state-of-the-art simulation language. Graphical model animation, and advanced output analysis are emphasized. Applications include improvement of existing and design of new production and service systems.

EIND 510. Design for Usability and Persuasion. 3 Credits. (3 Lec) F, odd years
PREREQUISITE: EIND 410 or EGEN 310R or consent of instructor. Usability engineering is an iterative design process that applies human-centered design principles to produce usable, desirable, and sustainable products, services and systems. The goal is to meet the needs of the user. In contrast, methods of persuasive design seek to guide user behavior toward the needs of others who may benefit from the purchase and use of these products and systems. This project-based course will use a seminar format with industry guest speakers from various disciplines to examine the methods and ethics of usability and persuasive design.

EIND 511. Advanced Human Factors. 3 Credits. (3 Lec) On Demand
PREREQUISITE: Basic knowledge of statistics (t-tests, ANOVA, regression, design of experiments) or consent of instructor. Advanced research methods applied to areas where ergonomics and human factors is playing a key role in increasing effectiveness, efficiency and safety of human-based systems. Example application areas include: (1) transportation systems; (2) health care systems; and (3) occupational work.

EIND 513. Human Factors in Complex Systems. 3 Credits. (3 Lec) F, even years
PREREQUISITE: EIND 313 or EIND 413 or consent of instructor. Advanced topics in human factors engineering applied to origins of human error in the failure of safety-critical systems in order to design systems with greater resilience. This seminar-based course uses lab demonstrations of human cognitive functions and case studies of human error in safety critical systems.

EIND 514. Occupational Biomechanics. 3 Credits. (3 Lec) S, odd years
PREREQUISITE: Basic knowledge of statistics (t-tests, ANOVA, regression, design of experiments); EIND 413 or consent of instructor. Topics relate to occupational biomechanics and bioinstrumentation application, focused on designing for the health and safety at work. Topics include the skeletal system, physiology, fatigue assessment, stress response, psychometrics, biomechanics, work design assessments and implementation of ergonomics programs.

EIND 525. Multi-Attribute Analysis. 3 Credits. (3 Lec) F, even years.
PREREQUISITE: EIND 364. Theory, methods and applications pertinent to decision making with multiple attributes and/or multiple objectives. Special emphasis is given to multi-attribute utility theory, goal programming, and multiple criteria optimization decision-making in modern manufacturing and service systems and in design decision-making to support competitive priorities of an enterprise.

EIND 554. DOE for Engineers. 3 Credits. (3 Lec) S, odd years
PREREQUISITE: EIND 354 or consent of instructor. Statistical analysis for managerial decision-making applied to engineering problems. Single and multi-factor ANOVA, randomized complete and fractional factorial designs with blocking and response surface designs.

EIND 557. Regression & Multivar Analysis. 3 Credits. (3 Lec) S, even years
PREREQUISITE: EIND 354 or consent of instructor Advanced topics in applied statistics for engineers. Topics include regression techniques: ANOVA, simple linear regression, multiple linear regression, and variable selection procedures; and multivariate analysis techniques: principal components, factor analysis, canonical correlation analysis, and clustering methods. Statistical analysis for managerial decision-making as applied to engineering problems. This course is co-convened with EIND 457.

EIND 558. Manage Forecast & Dec Analysis. 3 Credits. (3 Lec) F
Alternate Even Years PREREQUISITE: EIND 354 or EIND 457. Time series analysis through classical approaches including regression, smoothing models, and advanced time series models. Technical applications emphasized in concepts, tools, and methods. Individual investigations into financial, economic, and behavioral applications designed for managers to test real applications for making decisions.

EIND 574. Management Engineering Systems. 3 Credits. (3 Lec) S, odd years
PREREQUISITE: EIND 300 or consent of instructor. Students will explore various facets of designing effective organizational and management systems. Topics will include: classical and open system organization theory, socio-technical systems theory, congruence, technology and innovation management, knowledge management, and continuous improvement in organizations. Students will complete an independent research project in addition to course readings and in-class discussion.

EIND 575. Research or Prof Paper/Project. 1-4 Credits. (1-4 Ind) ES,Su
PREREQUISITE: Graduate standing. A research or professional paper or project dealing with a topic in the field. The topic must have been mutually agreed upon by the student, major advisor, and graduate committee.

EIND 589. Graduate Consultation. 1-3 Credits. (1-3 Ind) ES,Su
PREREQUISITE: Master’s standing and approval of the Dean of Graduate Studies. This course may be used only by students who have completed all of their coursework (and thesis if on a thesis plan) but who need additional faculty or staff time or help.

EIND 590. Master’s Thesis. 1-10 Credits. (1-10 Ind) ES,Su
PREREQUISITE: Master’s standing; consent of instructor.

EIND 591. Special Topics. 1-4 Credits. (1-4 cr)
PREREQUISITE: Upper division courses and others as determined for each offering. Courses not required in any curriculum for which there is a particular one-time need, or given on a trial basis to determine acceptability and demand before requesting a regular course number.

EIND 592. Independent Study. 1-3 Credits. (1-3 Ind) ES,Su
PREREQUISITE: Graduate standing, consent of instructor, approval of department head or director. Directed research and study on an individual basis.

EIND 598. Internship. 1-12 Credits. (1-13 Ind) ES,Su
PREREQUISITE: Graduate standing, consent of instructor and approval of graduate program coordinator. An individualized assignment arranged with an agency, business or other organization to provide guided experience in the field.

EIND 690. Doctoral Thesis. 1-10 Credits. (1-10 Ind) ES,Su
PREREQUISITE: Doctoral standing; consent of instructor.
