ETME 100. Introduction to Mechanical Engineering Technology. 1 Credit. (1 Sem) F
A seminar course surveying the mechanical engineering technology profession. Topics include an overview of career opportunities, problem solving processes, an introduction to the basic engineering design process, professionalism, professional registration, and ethics.

ETME 202. Mechanical Engineering Technology Computer Applications. 1 Credit. (1 Lab) F,S
COREQUISITE: M 166Q. Computer methodology, and use of various computer software packages in mechanical engineering technology applications.

ETME 203. Mechanical Design Graphics. 3 Credits. (2 Lec, 1 Lab) F,S
PREREQUISITE: EMEC 103, M 151Q. Course emphasizes the design process as it pertains to manufacturability, and the role of graphics to communicate design intent to production. Using 3-D software, design method, G,D,&T, and data management techniques, students will create drawings that communicate their designs.

ETME 215. Manufacturing Processes. 3 Credits. (3 Lec) F,S
PREREQUISITE: EMEC 250 or EMAT 251, M 182Q or M 166Q. ETME 100 or ETME 201. Introduction to basic applications of a wide range of manufacturing processes utilized in industry. Focus is on applications and capabilities of the processes, as well as equipment utilized and related costs associated.

ETME 216. Manufacturing Process Laboratory. 1 Credit. (1 Lab) F,S
PREREQUISITE: M 172Q or M 182Q or M 166Q, EMEC 250 or EMAT 251. ETME 215. Provides students with hands-on experience for performing and analyzing a broad spectrum of manufacturing processes including metal casting, injection molding, powder metallurgy, metal forming, metal removal, joining, inspection, and measurement.

ETME 217. Manufacturing Process Laboratory - Mechanical Engineering, 1 Credit. (1 Lab) F,S
PREREQUISITE: EMAT 252, ME majors only. COREQUISITE: ETME 215. Course will supplement lecture materials covered in ETME 215. Provides students with hands-on experience for performing and analyzing a broad spectrum of manufacturing processes including metal casting, injection molding, powder metallurgy, metal forming, metal removal, joining, inspection and measurement.

ETME 290R. Undergraduate Research. 1-6 Credits. (1-6 Ind) F,S,Su
PREREQUISITE: Consent of instructor and approval of department head or director. Directed undergraduate research/creative activity which may culminate in a written work or other creative project. Course will address responsible conduct of research. May be repeated.

ETME 291. Special Topics. 3 Credits. (1-4 Ind) On Demand
PREREQUISITE: None required but some may be determined necessary by each offering department. Courses not required in any curriculum for which there is a particular one-time need, or given on a trial basis to determine acceptability and demand before requesting a regular course number.

ETME 292. Independent Study. 1-3 Credits. (1-3 Ind) F,S,Su
PREREQUISITE: Consent of instructor and approval of department head or director. Directed research and study on an individual basis.

ETME 303. CAE Tools in Mechanical Design. 3 Credits. (2 Lec, 1 Lab) F,S
PREREQUISITE: ETME 203 or equivalent, EGEN 208, EGEN 324. COREQUISITE: ETME 321, EGEN 331. Emphasizes problem solving with the aid of the applied computer aided engineering techniques of Finite Element Methods and Computational Fluid Dynamics, in analysis and in the design process with a focus on proper use of the methods, as well as, verification, validation, and interpretation of results.

ETME 309. Building Information Modeling in MEP. 2 Credits. F
PREREQUISITE: ETME 203 or consent of instructor. Introduction to the use of Building Information Modeling (BIM) in the Mechanical, Electrical, and Plumbing (MEP) disciplines of the Construction Industry. Instruction in BIM basics using contemporary software, with hands-on exercises in typical construction applications.

ETME 310. Machining and Industrial Safety. 3 Credits. (1 Lec, 2 Lab) F,S
PREREQUISITE: ETME 203 and ETME 216; for MET majors only; or instructor approval. Offered Summers on demand. Introduction to modern machining technology and the key principles of industrial safety, material properties related to machining practices, design, and specifications. Semi-precision and precision lay-out are covered. An introduction to computer numerically controlled (CNC) technology and operations is included. Specific hands-on experiences included in laboratory.

ETME 311. Joining Processes. 3 Credits. (1 Lec, 2 Lab) F,S,Su
PREREQUISITE: EMEC 103, For MET majors only, COREQUISITE: ETME 216. Offered Summers on demand. Introduction to the modern science of joining technology, and detailed examination of metallurgy and materials properties as related to joining processes. Introduction to welding specification and symbols, and modern welding code usage. Weld design, set-up, preparation, application, and tests are emphasized. Specific hands-on experiences in OAW, SMAW, GMAW, GTAW, common separating processes; destructive and non-destructive testing are included in laboratory. This course will also expose students to other fastening joining techniques used in industry. Resistance welding, composites, riveting, and mechanical fastening and their application will be explored.

ETME 321. Applied Heat Transfer. 3 Credits. (3 Lec) F,S
PREREQUISITE: EGEN 324 or equivalent. COREQUISITE: EGEN 331 or equivalent. Study of the basic mechanisms of heat transfer and its applications. Introduction to equipment that utilize these mechanisms.

ETME 327. Commercial Building Energy Assessment Lab. 1 Credit. F
PREREQUISITE: ETME 203 or ETME 216. ETME 215. Improvement and optimization of building energy performance. Survey of building energy systems and equipment and the development of computer models of commercial buildings.

ETME 330. Mechanics. 4 Credits. (3 Lec, 1 Lab) F,S
PREREQUISITE: ETME 203. ETME 215. Study of the basic mechanisms of heat transfer and its applications. Introduction to equipment that utilize these mechanisms.

ETME 341. Machine Design. 4 Credits. (3 Lec, 1 Lab) F,S
PREREQUISITE: ETME 203 or equivalent and ETME 216. Application of mechanisms fundamentals, strength of materials, material selection, and tolerances and fits to the design of machines and machine systems. Specific hands-on experiences included in laboratory.

ETME 360. Measurements and Instrumentation Applications. 3 Credits. (2 Lec, 1 Lab) F,S,Su
PREREQUISITE: EMEC 103; For MET majors only. COREQUISITE: ETME 216. Study of measurement and instrumentation with an emphasis on industrial and manufacturing applications. Instruction in the design and application of measurement and instrumentation systems.

ETME 400. Mechanical Engineering Technology Senior Seminar. 1 Credit. (1 Sem) On Demand
PREREQUISITE: Senior standing. A seminar course focusing on career path development. Students will meet with current industry professionals to discuss specific careers, as well as meet with freshman students to share undergraduate experiences. Pass/Fail.

ETME 401. Fundamentals of Engineering Review. 1 Credit. (1 Lec) F,S,Su
PREREQUISITE: Senior standing. A seminar course focusing on career path development. Students will meet with current industry professionals to discuss specific careers, as well as meet with freshman students to share undergraduate experiences. Pass/Fail.

ETME 410. Computerized Numerical Control and Computer-aided Manufacturing Technology. 3 Credits. (1 Lec, 2 Lab) F,S
PREREQUISITE: ETME 310 or instructor approval. Application and optimization of computer numerical control (CNC) and computer-aided manufacturing (CAM) technology fundamentals as related to turning, milling, and plasma cutting operations. Development of toolpaths and machine code (G&M) from associated CAD models is emphasized. Specific hands-on experiences included in laboratory.
ETME 415. Design for Manufacturing and Tooling. 3 Credits. (2 Lec, 1 Lab) F S. PREREQUISITE: ETME 215; ETME 216 or ETME 217. COREQUISITE: EGEN 350; ETME 310 for MET majors; or instructor approval. An overview of production systems and lean manufacturing fundamentals and principles. Fundamentals of tool design, including tooling materials, workholding principles, jig design, fixture design, assembly tool design, design of tools for inspection and gaging, and tool fabrication techniques. Practical lab experiences will enhance the course material.

ETME 422. Principles of HVAC I. 3 Credits. (3 Lec) F S. PREREQUISITE: EMEC 320 or EGEN 324, ETME 321 or EMEC 326, or instructor consent. Heating, ventilating, air-conditioning and refrigeration (HVAC&R) for comfort and industrial applications. Psychrometrics, physiological factors in air-conditioning, HVAC load calculations; thermodynamic and HVAC system processes; air equipment and hydronic distribution; and an introduction to controls sequencing.

ETME 423. Principles of HVAC II. 3 Credits. (1 Lec, 2 Lab) S. PREREQUISITE: ETME 422 or consent of instructor. This course is designed to provide an in-depth study of various heating, ventilating, air-conditioning, plumbing, and electrical systems as they relate to building performance, and energy conservation. The focus of this course will primarily be to gain an understanding of system selection and layout, integrated building design, and building performance/energy modeling as it applies to various building structures. Control system layout and sequencing will also be explored in this course.

ETME 424. Thermal Processes Lab. 1 Credit. (1 Lab) F S. PREREQUISITE: For MET majors only and Building Energy System minors only. COREQUISITE: ETME 422. Laboratory experiences covering topics in heat transfer, thermodynamics, and HVAC areas in support of ETME 321, EGEN 324, and ETME 422.

ETME 425. Building Systems. 3 Credits. (3 Lec) F. PREREQUISITE: PHSX 207 and junior standing. This course is designed to provide an overview of the major systems found in buildings today. The focus of the course will be to examine the fundamental criteria involved in design of these systems as well as to investigate the equipment used to satisfy the design criteria. Scheduling, integration, and ethical issues associated with building systems design and installation will also be discussed.

ETME 430. Fluid Power Systems Design. 3 Credits. (2 Lec, 1 Lab) F. PREREQUISITE: EEE 250, EGEN 331 or EGEN 335; ETME 360 or EMEC 360 and EMEC 361; or consent of instructor. An introduction to the fundamentals and application of fluid power in industry today. Coverage includes: flow and pressure relationships, fluid properties, heat, filtration, selection of components, electro-hydraulic and electro-pneumatic systems, controls, design of hydraulic and pneumatic circuits, and troubleshooting.

ETME 460. Advanced Instrumentation. 3 Credits. (2 Lec, 1 Lab) F. PREREQUISITE: ETME 360 or EMEC 360, EMEC 361; or equivalent, or consent of instructor. An applications-based course in advanced instrumentation and control, focusing on parameter identification; test planning; proper transducer selection, installation, and operation; computerized data acquisition programming and operation; handling and presentation of acquired data. Theory and practice is merged in a project setting.

ETME 462. Industrial Processing Automation and Controls. 3 Credits. (2 Lec, 1 Lab) F. PREREQUISITE: ETME 360 or EMEC 360, and EEE 250. The intent of this course is to equip engineering students with the basic understanding of industrial processes, knowledge of the fundamental machines, sensors, and controls used in automated processing, and an understanding of processing system design.

ETME 470. Renewable Energy Applications. 3 Credits. (2 Lec, 1 Lab) F. PREREQUISITE: ETME 360 or EMEC 360, EMEC 341; ETME 340 or EMEC 341; or consent of instructor. Experience with energy technologies including wind, solar thermal, solar photovoltaic, fuel cell, biomass, and hydro-electric systems. Lecture covers practical applications, component design, and theory for devices and systems. Social, economic, geopolitical, and environmental considerations are discussed. Hands-on lab activities supplemented with site visits.

ETME 489. Capstone: Mechanical Engineering Technology Design I. 2 Credits. (1 Lec, 1 Rec) F S. PREREQUISITE: EGEN 310, for MET majors only with senior standing. COREQUISITE: ETME 303, ETME 360 or EMEC 360, EGEN 325 or EGEN 330, ETME 310, ETME 311, ETME 340, ETME 341. Senior capstone design experience in Mechanical Engineering Technology. Students, under the guidance of a faculty supervisor, solve real-world design problems.
