PREREQUISITE: Honors College freshman students whom have been accepted for Fall entry. Climate change can be a tricky topic – a ‘trigger’ phrase in some communities that inspires derision by those skeptical that humans can alter our atmosphere and planetary systems. At the same time, the phrase might inspire an equally heartfelt level of scorn by those promoting (with, at least recently, little success) policies that should spur sharp reductions in human emissions of greenhouse gases so as to minimize the consequences of rising atmospheric greenhouse gas concentrations. Our broadest course objective is to improve students ‘climate literacy’ on four focal areas of Montana’s economy
