RBPF - Residential Bldg Performance

RBPF 100  Res Build Perf Seminar: 1 Credits (1 Lec)
Taught in a discussion format, students learn critical thinking skills and explore issues in building science. Students will research career paths and industry certifications. This course serves as an orientation to MSU and the degree with a short, optional field experience. Intended for students in the Residential Building Performance program.

RBPF 103  Wx Installer Tech Fund: 2 Credits (2 Lec)
This course provides an overview of weatherization measure, standards, and residential building performance practices including building science basics and the house as a system. Additionally, students will research career paths and industry certifications. This course serves as an orientation to MSU and the degree with an optional field experience. Intended for students in the Residential Building Performance program.

RBPF 104  Weatherization Installer Tech: 2 Credits (2 Lec)
PREREQUISITE: RBPF 100. This course provides an overview of weatherization measures, standards, and residential building performance practices, including building science basics and the house as a system.

RBPF 110  App Energy Effic Math: 1 Credits (1 Lec)
Students in this course will learn about topics in applied mathematics (heat transfer, air changes per hour, HVAC sizing, etc.) directly connected to weatherization and energy efficiency.

RBPF 116  Energy App Health & Safety: 2 Credits (2 Lec)
Energy Applied Health and Safety provides students with a knowledge of energy-related hazards, combustion gases, building air tightness, lead-based paint, asbestos, and other risks associated with improving the energy of existing homes.

RBPF 121  Insulation Sys & App: 2 Credits (2 Lec)
The student will learn types, performance and applications of interior and exterior residential insulation systems.

RBPF 124  Res Green Design Build: 2 Credits (2 Lec)
This course provides an overview of energy efficient residential building concepts, including building design, composition, materials, and orientation. The purpose of the course is to provide a foundation for understanding green building systems and processes.

RBPF 134  Single Family Engy Audit: 2 Credits (2 Lec)
PREREQUISITE: RBPF 100. This course covers basic guidelines for Energy Auditors in Single Family Homes as well as math basics, building assessment strategies, and work order procedures.

RBPF 140  Heat Sys Engy Aud & Inspectors: 2 Credits (2 Lec)
PREREQUISITE: RBPF 100. This course covers basic guidelines for evaluating heating systems as an Energy Auditor. Low pressure boilers, forced air furnaces, and sealed combustion system analysis are the main focus of this course.

RBPF 160  Building Performance Software: 2 Credits (2 Lec)
PREREQUISITE: RBPF 100. This course provides an overview of various options for Energy Audit and Building Performance Software concentrating on evaluating homes and gathering required data for input.

RBPF 170  Renewable Energy Concepts: 2 Credits (2 Lec)
PREREQUISITE: RBPF 100. This course provides an overview of installation and maintenance of renewable energies including wind, solar (pv), geothermal, and solar hot water.
