WLDG - Welding Technology

WLDG 103. Welding Fund for Const Trades. 2 Credits. (2 Lab) F
Prerequisites: CSTN 135, CSTN 145, CSTN 161, CSTN 171 Corequisites: CSTN 230, CSTN 260 This course is specifically designed to teach students the basic welding methods that a carpenter might face (i.e. steel studs). Students will cover basic welding processes used in the trade applications.

WLDG 104. Technical Mathematics. 3 Credits. (3 Lec) F
This course presents basic mathematical topics as they are applied in a trades program. Topics covered include: use of measuring tools, measurement systems, dimensional arithmetic, percent, proportion, applied geometry, and basic trigonometry. This course is intended for CAS and AAS-degree seeking students and does NOT provide sufficient Pre-Algebra material as a pre-requisite for subsequent mathematics courses.

WLDG 106. Welding Fabrication Methods. 3 Credits. (3 Lab) F
Prerequisites: WLDG 110, WLDG 111, WLDG 121, WLDG 205 Corequisites: WLDG 120, WLDG 122 This course provides an introduction to basic fabrication of structural steel in accordance with industry standards.

WLDG 110. Welding Theory I. 1 Credit. (1 Lec) F,S
COREQUISITE: WLDG 111 This course covers welding safety, oxy-fuel and shielded metal arc welding (SMAW), definitions covering joining common metals, joint and weld classifications, welding positions, power source selection, plus manual and semiautomatic cutting processes, and terminology.

WLDG 111. Welding Theory I Practical. 3 Credits. (1 Lec, 2 Lab) F,S
COREQUISITE: WLDG 110 Oxy-fuel practical work will involve fusion welding, brazing, and cutting. Shielded metal arc welding (SMAW) practical work will involve flat and horizontal welding skills using a variety of electrodes.

WLDG 117. Blueprint Reading and Welding Symbols. 2 Credits. (2 Lec) F
This course will introduce blueprints and emphasize reading and interpreting welding symbols. Topics covered include basic blueprint reading for welders; basic lines, basic views, title block information, dimensions, structural shapes, auxiliary views, section views, detail prints, welding symbols and other various blueprint information.

WLDG 120. Welding Theory II. 2 Credits. (2 Lec) S
Prerequisites: WLDG 110, WLDG 111, WLDG 121 Corequisites: WLDG 122 This course will concentrate on the processes which use inert and/or inert and active gas mixtures for shielding during welding. Gas metal arc welding (GMAW), flux core arc welding (FCAW), Shielded Metal Arc Welding (SMAW) procedures will be thoroughly covered. Process selection and use for welding ferrous and nonferrous metals will be covered.

WLDG 121. Welding Theory II Practical. 3 Credits. (3 Lec) F
Corequisites: WLDG 110, WLDG 111 Practical work involves application of SMAW, GMAW and GTAW as it is used in industry today. Use of the various modes of metal transfer, joint styles, welding positions, welding of carbon and stainless steels, and aluminum alloys on various joint styles and in various welding positions, and manipulation techniques will be emphasized.

WLDG 122. Welding Theory III Practical. 3 Credits. (3 Lab) S
Prerequisites: WLDG 110, WLDG 111, WLDG 121 Corequisites: WLDG 120 This course continues skill development from WLDG 121. Practical work involves the application of SMAW and GTAW as it is used in industry today. Use of the various modes of metal transfer, joint styles, welding positions, welding of carbon and stainless steels, and aluminum alloys on various joint styles and in various welding positions, and manipulation techniques will be emphasized.

WLDG 130. Intro to Structural Welding. 3 Credits. (3 Lec) S
Prerequisites: WLDG 110, WLDG 111, WLDG 121, WLDG 205 Corequisites: WLDG 120, WLDG 122 This course covers Gas Metal Arc Welding (GMAW), Shielded Metal Arc Welding (SMAW), and Flux Core Arc Welding (FCAW) procedures to prepare for industrial certification. This includes welding single vee groove weld but joints with backing strip in the flat, horizontal, vertical, and overhead position following the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME) code specifications.

WLDG 145. Fabrication Basics. 3 Credits. (3 Lec) S
Prerequisites: WLDG 110, WLDG 111, WLDG 121, WLDG 205 Corequisites: WLDG 120, WLDG 122 The introduction to basic fabrication of structural steel in accordance with industry standards.
