M.S. in Applied Economics

Year 1: Fall
ECNS 594  Seminar  1
ECNS 594  Seminar  1
AGBE 467  Quantitative Method in Ag Econ  3
ECNS 401  Microeconomic Theory  3

Year 1: Spring
ECNS 561  Econometrics I  3
ECNS 501  Microeconomic Theory  3
ECNS 502  Macroeconomic Theory  3
ECNS 562  Econometrics II  3

Year 2: Fall
ECNS 590  Master's Thesis  1-10
ECNS 569  Research Methodology  1

Minimums of 21 course credits and 10 semester credits of thesis. Students are permitted to continue into the spring semester of year 2 to complete their theses.

Students may choose to study special topics on an individual basis as either ECNS 592 Independent Study, AGBE 592 Independent Study, or AGBE 591 Special Topics. Students should consult with a faculty member and agree upon a plan of study before the beginning of the semester in which the credits are to be undertaken. The Graduate School must approve all such courses and limits the number of credits to 3.

Supplementary coursework and research may focus on agricultural economics, natural resource economics, or general applied economics. Students may supplement their studies with additional courses, e.g., math and statistics course to prepare for PhD in agricultural economics or economics. Through continued discussions with the advisor and other faculty, students will select additional courses to complete a program of study consistent with their interests.

Graduation Requirements
Students are required to maintain a 3.0 grade point average overall in their core courses and the courses in their graduate program. Failure to meet these requirements, as well as receipt of more than one grade less than a "B-" in the core courses will be grounds for termination.

Students must pass the Core qualifying exam (two attempts) and an oral examination of their thesis. The oral examination is administered by the student's graduate committee and is open to all members of the faculty. Students are expected to present a typed draft, in final form, of the thesis to each member of their graduate committee at least seven days prior to the scheduled date of their examination. The thesis must be approved by the Graduate School.
