Ph.D. in Animal & Range Sciences

Requirements

The Ph.D. program is based upon an area of specialization in research and intensive coursework that would normally require three years of full-time work beyond the M.S. degree.

- In addition to departmental requirements, candidates must fulfill the requirements of The Graduate School. Ph.D. students must complete the following:
  - One credit of ARNR 507 Research Methods
  - Two credits of ARNR 594 Seminar
  - A three credit graduate (400-500 level) course in experimental design and six credits of graduate statistical methods courses within the M.S. and Ph.D. program
- The major professor and the student’s graduate committee will determine additional specific course requirements for completion of the Ph.D. degree.
- All Ph.D. programs must comply with The Graduate School, including 60 credits hours (18 which must be dissertation credits) above the B.S. degree.
- Students must choose either the Animal Science option or the Range Science option; beyond this there are no specific minimum course requirements for the PhD program.
