

# Family & Consumer Sciences

## Family and Consumer Sciences

The master's degree in family and consumer sciences creates opportunities for students to develop a deeper and applied understanding of family and human development theory, research methods, and program planning and evaluation. The program is designed to accommodate students who wish to attend graduate school full-time as well as working professionals who require more flexibility. Students may pursue an added endorsement in family and consumer sciences education, designed for students who wish to become licensed to teach Family and Consumer Sciences in grades 5-12. Upon completion of the degree, students are eligible for licensure in the state of Montana. For more information on admission to the Teacher Education Program, student teaching, licensure, professional expectations and more, please visit the Teacher Education Program (<http://catalog.montana.edu/undergraduate/education-health-human-development/department-education/#teachereducationprogramtext>) section of this catalog. Students pursuing this added endorsement will work with an advisor to determine required courses and specific electives.
