TE - Technology Education

TE 250CS. Technology and Society. 3 Credits. (1 Lec; 2 Lab) F.S.Su
Closely linked to the various sciences, technology has developed out of human
need to solve real problems of society and to advance science. An exploration and
examination of major technological periods, inventions, and innovations that have
altered the course of humanity and their impact on the civilization process will lead
to a perspective on technological literacy. This course will introduce students to
the study of technology, not so much as a method for “doing technology,” but as an
impetus for social and cultural change related to technology.
