WILD 429. Yellowstone Wildlife Habitat Ecology. 2 Credits. (2 Lec) Su
PREREQUISITES: Junior standing and a Biology course or consent of instructor.
This course will describe the native communities of the internationally prominent
northern Yellowstone winter range for wild ungulates. The ecology of many
organisms, both plant and animal will be studied. Plant identification skills will
be incorporated with an emphasis on the recognition of the Yellowstone northern
range's flora and its importance as wildlife habitat. Ecosystem interrelationships
will form the basis for understanding the ecology of the range and interpreting the
consequences of management alternatives.
