- Soil Science Minor (http://catalog.montana.edu/undergraduate/agriculture/environmental-sciences/soil-science-minor-nonteaching/)
- Technology Education Minor (http://catalog.montana.edu/undergraduate/agriculture/technology-education/)

Housed in four academic departments on campus (Animal and Range Science, Ecology, Microbiology and Immunology and Plant Sciences and Plant Pathology) the Genetics Minor is available to students majoring in agricultural and natural resource disciplines.

A Natural Resources and Rangeland Ecology minor provides students with the basics of managing rangeland ecosystems for wildlife habitat, livestock production, and soil and water conservation.

The Soil Science minor is designed to provide non-majors with fundamental soils courses in preparation for natural resource careers.

Designed to develop and enhance students' technological literacy, the Technology Education minor is available to allow for diversity in personal interests and career aspirations.

The Water Resources Minor is designed to encourage a student from any discipline to explore water resources beyond course work in their major.
