Bachelor of Fine Arts in Integrated Lens-Based Media

The School of Film and Photography (SFP) prepares students to meet the challenges of a rapidly expanding media environment as professionally trained creative artists and informed critical thinkers. Our students develop their own voices as tomorrow’s leaders through intensive hands-on exploration of film, photography and related media.

The School of Film and Photography offers two undergraduate degrees, a Bachelor of Arts degree (BA) in Film and Photography and a Bachelor of Fine Arts degree (BFA) in Integrated Lens-Based Media. The BA offers separate concentrations (options) in Film or Photography. Each of these two options offer ample opportunity to explore both areas if desired, while providing a strong focus for students to pursue professional career opportunities in the area of their choosing. Students who wish to explore the relationship between Film and Photography even further as integrated artistic media may apply for the Bachelor of Fine Arts (BFA) Program in Integrated Lens Media.

The Bachelor of Fine Arts in Integrated Lens-Based Media in the School of Film & Photography at MSU-Bozeman provides students with an intensive, interdisciplinary course of study in cinematic and photographic media that culminates in the creation of a comprehensive capstone project. As a professional degree, the BFA in Integrated Lens-Based Media prepares students to pursue graduate study and for careers as professional artists.

Students apply for admission to the BFA in the spring of their sophomore year, after having completed a prescribed sequence of foundational courses in the production, analysis, and history of film and photography. Admission into the program is limited to students who have already been admitted into both the Film and Photo option at the conclusion of their freshman year. Students admitted into the program are assigned two advisors—one photographer and one filmmaker—with whom they design a customized curriculum for the final two years of the degree.

A minimum of 120 credits are required for the BFA degree. 42 of the 120 must be Upper Division (UD) credits (300 or 400).
