Developmental Education

The Developmental Education program offers individual courses that prepare students for college-level work in math, writing, and college studies. High quality instruction, small class sizes, and out-of-class support are hallmarks of the Developmental Education program.

Credit from developmental coursework (below 100-level) does not count as college-level credit and does not meet graduation credit requirements for diploma or degree programs. Grade points earned in this course are not included in a student’s grade point average calculation. Developmental courses may be used to determine financial aid eligibility.

Courses taught include:
