1 If you want to take a full year of Physical Chemistry (CHMY 371, CHMY 372 and CHMY 373) then you will need to take M 171Q, M 172, and M 273 (see footnote 2).
2 Students should consider taking the full year of Physical Chemistry sequence (CHMY 371 and CHMY 372 in the fall and CHMY 373 in the spring) instead of the one-semester overview, particularly if planning to go to graduate school. As noted in footnote 1, this sequence requires more calculus as prerequisite coursework.
3 Six (6) credits of Undergraduate Research BCH 490R are tabulated. Students are encouraged to fulfill additional credits of research up to a maximum of 12 credits of 490 R research whether it be in CHMY, BCH , or another department.
4 A minimum of 9 credits of physical and biological science electives are required.
5 BCH 499 (Senior Year) is required for majors who are writing a thesis for Departmental Honors consideration.
6 CHMY 311 should be taken before CHMY 361 or CHMY 371
All students are encouraged to take a 200 level English writing course. Please note that this course would be in addition to the core requirement.

A minimum of 120 credits is required for graduation; 42 of these credits must be in courses numbered 300 and above.
