

Department of Entomology

The graduate program in Entomology at Montana State University leads to a Master of Science degree. Students in the program are required to take formal course work and conduct independent research guided by the student's advisory committee. Each student, during the course of their graduate program, will also have the opportunity to participate in activities outside their degree program that will benefit them academically and professionally. Such activities include participating in teaching, outreach and international programs, and attending and presenting research results at professional meetings.
