

# Film Option

The School of Film and Photography (SFP) prepares students to meet the challenges of a rapidly expanding media environment as creative artists and critical thinkers. Our students develop their own voices as tomorrow's leaders through intensive hands-on exploration of film, photography, and related media.

The School of Film and Photography offers a Bachelor of Arts degree (BA) with concentrations (options) in Film or Photography, plus a Bachelor of Fine Arts degree (BFA) in Integrated Lens-Based Media.

The BA and BFA degree options share a common foundation dedicated to the relationships between film and photography. This integrated foundation permits students to take courses in Film or Photography while they complete the requirements of the option they have selected as their concentration. Students who pursue the BFA will be able to design their own curricular path in consultation with their advisor.

After the completion of a successful freshman year of introductory courses in media production, analysis, and history, students will continue to develop advanced skills and knowledge of photography and/or filmmaking over the next the three years.

Both degree options provide flexibility for students who want to broaden their education with course work outside of the School of Film and Photography. All students are encouraged to study abroad, minor in another area of interest, and even double major.

Students who select the Film Option will gain hands-on experience in all aspects of motion picture production, starting in the freshman year and culminating in a senior thesis film project. Students have the ability to explore areas of particular interest in directing, editing, cinematography, sound design, production management, scriptwriting, etc. At the same time, students study film history and film theory to broaden their understanding of film as a highly developed medium of artistic expression and commercial entertainment industry. While we do provide classes that apply to the film profession, we place more importance on providing a broad education to prepare students for a wide range of future opportunities not confined to an industry.

## Film Option Curriculum

Freshman Year	Credits	
	Fall	Spring
FILM 101IH - Understanding Film and Media	3	
FILM 112 - Aesthetics of Film Production I	3
