

# Department of Military Aerospace Studies

## **Military Air & Space Studies- Air Force ROTC**

The Air Force Reserve Officer Training Corps (AFROTC) program prepares student-cadets to become officers in the United States Air Force and Space Force. AFROTC is a four-year program in which students enroll in exclusive classes and leadership workshops to gain tools to succeed in a future career as an Air Force or Space Force officer and beyond. All credits offered by the department may be counted as general electives toward completion of the requirements in other curricula. Student-cadets completing the program attend Field Training between their Sophomore and Junior years. Students not seeking a commission may still enroll in the Freshman and Sophomore MAS classes, but do not wear the uniform or participate in Leadership Lab.

## **Undergraduate Programs**

*The Norm Asbjornson College of Engineering provides administrative support for the Reserve Officers' Training Corps (ROTC) programs in the Air Force and Army.*
