

Culinary Skills (Certificate of Completion)

This Certificate-level program in Culinary Skills is intended to provide the student with the basic skills and knowledge to step into Hospitality/ Culinary industry kitchens, ready to perform tasks at or above entry level, and immediately be a part of a culinary team in that kitchen. It is always an expectation that Chefs and operators will train new employees in the specific duties of their establishment; this program will allow the students to bypass the basic training of an operating kitchen and jump right to the location-specific duties and expectations of the culinary staff in that kitchen.
